AIDE

**SAY GOODBYE
TO EVENT
UNCERTAINTY
WITH TRUE
ARTIFICIAL
INTELLIGENCE.**

Reduce
false positives by
10x

AIDE from SmartWitness can save you from constantly reviewing non-events and instead provides you with Smart Events. *AIDE* uses cloud-based AI and machine learning to deliver context beyond what the camera sees — making better judgments about what transpired.

Upgrade to *AIDE* for FREE!

Non-event: Downhill braking is required.

AIDE CAN DISCERN BETWEEN:

A pothole and
a collision

An expected
acceleration and
an unsafe speed
increase

A need to brake
downhill and
hard braking

A sharp curve
and a collision
avoidance
maneuver

BENEFITS

- No need to replace existing hardware
- Decreases fleet manager and driver frustration
- Increases fleet manager productivity

Enabling *AIDE* to your current platform requires a small amount of development, typically implemented within a single sprint.
